

WALL STICKER INSTRUCTIONS

STEP 1

Use the plastic scraper included in the supply kit to scrape across the transparent transfer sheet. This will ensure that the WALL STICKER is completely affixed to the transfer sheet. If your WALL STICKER has multiple images, cut the sheet so you have separate stickers for each image, then place each image wherever you wish.

STEP 2

Carefully pull off the white paper backing so that the WALL STICKER is left on the transparent transfer sheet with the sticky side facing outwards. Remove the backing slowly and carefully. If parts of the WALL STICKER should remain on the backing, use the plastic scraper to firmly affix it to the transparent transfer sheet.

STEP 3

Place the image where you want it to appear on the wall or any flat surface. Use the plastic scraper on the transfer sheet to affix the image to the wall. Begin at the middle of the image scraping outwards.

STEP 4

When you have ensured that the WALL STICKER is completely fastened to the wall, carefully remove the transfer sheet.

Enjoy!
